Enterprise IP Solutions **Phones**

Enterprise IP Solutions Phones

Style and intelligence on your desktop

To help you and your staff take full advantage of the features of Samsung's IP Solutions wide range of easy-to-use ergonomic handsets are available, giving each user the correct handset for their needs.

Digital phone, IP phone Full Line-up: A choice of simple handsets or fully featured terminals with interactive LCD display and programmable functions put the power of Samsung's IP Solutions in the hands of every user to suit each individual application.

Full Feature transparency IP Phones: Each Samsung handset is as either a traditional keyphone or IP terminal with a common look and feel for the operator should they ever use an alternative handset. Samsung

phones can offer 14 or 21 programmable keys, LED status indication and an LCD screen to display call and integral system information. In addition, the 12 button display handset has an enlarged LCD, graphic, icons, and many convenient features.

Navigation Keys: Specialized Navigation keys available with Samsung handset range allow the user to quickly and simply steer through the system's integral menus and feature set. Call handling efficiency can also be improved, as call control is made much easier through single button call answer, transfer and completion.
